Dear Jackie

Just a note to say thank you so very much for my new website.

It has made such a difference to have such a professional, well designed site. Never in a million years did I think I could afford to have one built to this standard – you have made this possible.

I cannot thank you enough for your professional courtesy and expertise. I am a complete novice at this and I now have a site that has made me very proud to own.

I also thank you for your ideas and suggestions which have all worked well within the site. All were given without making me feel like a complete idiot and at all times I felt 'involved' in the design.

I am more than happy to recommend your services to family and friends alike and also for you to maintain the site for me. I have complete confidence in your abilities and skills.

Karen
